Times Tables in Six Weeks

Grades 3-4 · 30 pages · the order that actually works

The tables in the order that makes them easiest — 2, 5, 10 first, the hard ones last — then mixed pages that test recall rather than pattern.

PAGES	ANSWER KEYS	WEEKS	FOR
30	All 30	6	parents and teachers

pencilpocket.com · free to print and photocopy for your own family or class

Why this order

Most times-tables books march from 1 to 12, which is the worst possible order. This one front-loads the tables that are nearly free (2, 5, 10), uses them to unlock 4 and 6, and saves 7 and 8 for when the child already knows most of those facts from the other direction.

How to use it

Five pages a week for six weeks. Three minutes a day beats an hour on Sunday — recall is built by frequency, not duration.

Weeks 1 to 4 build up table by table. Weeks 5 and 6 are mixed, which is the part that matters: a page of one table can be answered by spotting the pattern, a mixed page cannot.

By the end, there are only a handful of genuinely hard facts left. Those are 6×7 , 7×8 and 8×9 , and they are worth attacking directly.

A note on answer keys. Every key in this book was produced by the same software that produced the questions, so the two cannot disagree. If you ever find one that does, that is a bug and we would like to know: pencilpocket.com.

Progress chart

Colour a box each time a page is finished. This is the only scoring that matters.

Week	Day 1	Day 2	Day 3	Day 4	Day 5
1					
2					
3					
4					
5					
6					

Missing a day is fine. Missing a week is fine. Starting again is fine.
